

June 15, 2018

Dear Applicant,

Thank you for your interest in the Marin Master Gardener Training Program. Marin Master Gardeners work under the auspices of the University of California Master Gardener Program and UC Cooperative Extension Marin to carry out the mission of providing horticultural education and service to the public.

We are seeking Marin County residents who are enthusiastic about horticulture and sustainable gardening practices and who have a commitment to community service.

The training program requires a strong commitment to class participation, study, and volunteering, including working at the Help Desk in Novato.

Being a Master Gardener is a highly rewarding experience for the approximately three hundred and twenty Marin County residents who are currently certified as active Master Gardeners.

We look forward to receiving your application.

David Lewis, Director  
UCCE – Marin
